

### **Advanced Database Systems (CS60113)**

Assignment 4. Concurrency Control

(Due Date: October 18 2020)

**NOTE: This is an individual assignment.**

Please read the paper “[A Critique of ANSI SQL Isolation Levels](#)” in detail and prepare a Powerpoint slide (about 15 slides) with audio recording explaining the important concepts given in the paper. Upload the Powerpoint file in Moodle. If you face any difficulty in creating the slides using Powerpoint, you may use any other software. However, the audio should be auto-playable with no need for clicking a button in every slide. If the file is too large, please put it up on Google drive and share the link. You may also put it up on YouTube and share the link if you wish.
